

Animal Enhancement Activity—KS-ANM07
Extending existing field borders for water quality protection and wildlife habitat

Kansas Criteria for National Animal Enhancement Activity—ANM07

1. Refer to Conservation Practice 386, Field Border, for additional field border information.
2. For wildlife-friendly seeding recommendations, refer to Conservation Practice Construction Specifications 550, Range Planting. Brood cover mix is recommended to benefit adapted bird species.
3. Conservation Practice Construction Specifications 391, Riparian Forest Buffer, contains additional information pertinent to field border application.
